[Math Magic Pro For Indesign Crack 46](#)

The screenshot displays the MathMagic Pro v7.0 for InDesign software interface. The main workspace contains several mathematical and chemical formulas:

- A quadratic formula:  $y_{\Delta} = \frac{-b \pm \sqrt{b^2 - 4ac}}{2a} \left( \cos \frac{\pi}{3} + \sin \frac{\pi}{3} \right)$
- A fraction simplification:  $\frac{\cancel{27}^3}{\cancel{100}^{10}} \times \frac{\cancel{10}^1}{\cancel{9}^1} = \frac{3}{10}$
- A complex product formula:  $C_z^{-M} \frac{\prod_{m=1}^{M_o} (z - z_m^0)}{\prod_{m=1}^{M_o} \dots}$
- A chemical reaction:  $2\text{NH}_4\text{IO}_3(\text{aq}) \xrightarrow{\text{heat}} 3\text{H}_2\text{O}(\text{l}) + ?$  with "solution" written below the reactant.

The interface includes a menu bar (File, Edit, View, Style, Size, Format, Window, Help), a toolbar with various mathematical symbols, and several floating panels: "Clips", "Nudge", "Size", and "Color". The "Color" panel is open, showing "Application-wide Colors" and "Document-used Colors" with options for CMYK and RGB color selection.
